[Nov 23, 2025] – Sprint 3 Standup #1

1) What did you work on since the last standup?
Since the last standup I have been working on my new task which is adding the Badges and Achievements section to our application, which can eventually be shown in the user profile page. I came up with 5 specific badges that can be earned by users if the conditions are met. I was able to finish most of the backend and frontend logic for this task.

2) What do you commit to next?
Next, I plan to continue to test if the badges are being awarded correctly for the test users. If any bug fixes come up related to the badges I will also keep an eye out for that.

3) When do you think you'll be done?
I plan to finish testing and finishing off this task by Wednesday.

4) Do you have any blockers?
None as of right now.

[Nov 23, 2025] – Sprint 3 Standup #1

1) What did you work on since the last standup?
I started working on the end-of-month spending report feature. I have been setting up the backend logic that pulls spending data by category so we can match this month's numbers with previous months. I also drafted the structure for the insights section where we'll show things like biggest expense category and the percent change between different months.

2) What do you commit to next?
Next I'll continue building out the insight calculations and connect everything to the frontend so we can display the report cleanly.

3) When do you think you'll be done?
I should be finished this task by Wednesday.

4) Do you have any blockers?
None as of right now.

[Nov 23, 2025] – Sprint 3 Standup #1

1) What did you work on since the last standup?
I worked on and finished the feature E3TXS-32 Alert Notifications for Budget Limits. I implemented the logic to detect when the user reached 80–90% of their budget. I also created a dashboard popup that shows a clear alert for each affected category budget that auto hides or can be manually closed. The alerts also appear above each budget bar nearing the limit.

2) What do you commit to next?
Next I will start working on the feature E3TXS-28 View History of Budgets.

3) When do you think you'll be done?
I should be finished this task by Saturday.

4) Do you have any blockers?
None as of right now.

[Nov 28, 2025] – Sprint 3 Standup #2

1) What did you work on since the last standup?
Since the last standup, I tested my badges feature a little bit more and I realized there was an inconsistency for how the badges were being awarded, specifically for the UNDER_ALL_BUDGETS badge. I was able to fix this bug and plan on committing this to the branch today.

2) What do you commit to next?
Next, I want to update the system design document with the new changes that came from the badges feature.

3) When do you think you'll be done?
I plan on adding the changes to the system design document for this new feature by monday night (latest).

4) Do you have any blockers?
None as of right now.
