November 7, 2025

Priya — 07/11/2025, 16:42
[Nov 7, 2025] – Sprint 2 Standup #1

1) What did you work on since the last standup?

I started working on the "E3TXS-22 Set Budgets" feature and created the budget entity which is stored as a table in the database. I added various endpoints in BudgetController for managing user budgets and also added query methods in BudgetRepository for fetching budgets from the database.

2) What do you commit to next?

Finishing off this feature by modifying some of the expense entity logic so that whenever an expense is added, deleted or updated, the corresponding budget with the same category and month, is also updated through the "amount spent" field.

3) When do you think you'll be done?

I will finish off this feature by the end of this weekend (Sunday November 9th).

4) Do you have any blockers?

No major blockers right now, but we did as a team face some issues with our database being stuck in "restart" mode. It is back up and working now, and we have created a sql script with test data as a backup in case we encounter this issue again.

Eesha — 07/11/2025, 19:57
[Nov 7, 2025] – Sprint 2 Standup #1

1) What did you work on since the last standup?
I've been working on E3TXS-24: View, Create, and Manage Groups. I built the frontend "Create Group" button and connected it to the backend endpoint for group creation. On the backend, I added the "groups" tables in Supabase and linked it to the existing users table with foreign key relationships.

2) What do you commit to next?
I'll finish setting up the group_members table in Supabase and update the backend. After that, I plan to test group creation end-to-end to confirm that new groups appear in the UI as expected.

3) When do you think you'll be done?

I expect to complete the group creation functionality by the end of Sunday, November 9th.

4) Do you have any blockers?
The main blocker was the data type mismatch between UUIDs in Supabase and using Long in the backend, which caused the insert errors. I'm addressing this now by updating the entity models and foreign key configurations.

[Nov 7, 2025] – Sprint 2 Standup #1

1) What did you work on since the last standup?
I started working on E3TXS-43 Backend for Recurring. For this feature I started working on implementing the recurring expense in the backend by adding the recurring boolean attribute to the expense as well as editing add expense in the expense controller to ensure that the expense is added to each future month.

2) What do you commit to next?
Finishing this feature and then testing to make sure that it works as expected in the acceptance criteria.

3) When do you think you'll be done?
I will finish off this feature by the beginning of next week (Tuesday Nov 11).

4) Do you have any blockers?
No major blocker for me currently, however to finish this feature, the recurring checkbox on the add expense pop up needs to be implemented.

Ashal — 07/11/2025, 23:04
[Nov 7, 2025] – Sprint 2 Standup #1)

What did you work on since the last standup?

I've been working on/E3TXS-37-Dashboard-(current-month-default). I added logic and UI so the dashboard automatically displays the current month's expenses and budgets by default. This includes the new helper functions for detecting the current month range, summary calculations (total spending and spending by category), and the updated layout that shows the "Expenses this month" section.

What do you commit to next?

I will be finishing this feature by adding the remaining budget as well after working on group expenses features as a group.

When do you think you'll be done?

I'll finish final testing with the backend today, so it should be ready to merge by Saturday night.

Do you have any blockers?

No major blockers but I am just verifying that the backend returns the correct data for the current month and make sure data loads correctly.

Abrar — 07/11/2025, 23:52
[Nov 7, 2025] – Sprint 2 Standup #1

1) What did you work on since the last standup?
I've been working on E3TXS-29: Add and Split Group Expenses. I worked on creating a pop up table page that will allow users in groups to add expenses once they click the button "Add Expense". I also worked on the frontend table to split expenses between users.

2) What do you commit to next?
I'll create a group expense table in Supabase and update the backend accordingly. Once the frontend and backend are made I will test adding group expenses and modifying it.

3) When do you think you'll be done?
I am estimating that by Tuesday, Nov. 11, I'll complete the add group expense feature.

4) Do you have any blockers?
No major blockers as of now however, I would need to make sure that expenses and split update at the same time in the database to keep data integrity.

November 12, 2nd Standup

Priya — 12/11/2025, 18:27
[Nov 12, 2025] – Sprint 2 Standup #2

1) What did you work on since the last standup?

I finished the "E3TXS-22 Set Budgets" feature and also started working on the "E3TXS-39 View Budget Progress" task. For this task I needed to allow the user to create budgets for each month, and then also be able to update these budgets by dynamically showing how much of the budget had already been spent to allow users to track how close they are to hitting their limits. I was able to finish this task and now both of these features are merged into the develop branch.

2) What do you commit to next?

Next, I commit to look into updating the system design document based on the new budget feature that has been added. Also I plan on fixing any bugs or issues that may come up in regards to the budget feature as soon as possible.

3) When do you think you'll be done?
Hoping to update the system design document with my new additions by this Saturday (Nov 15).

4) Do you have any blockers?
No blockers right now, but I may need to update some of my tasks based on the other features that are currently being worked on.

Abrar — 12/11/2025, 20:34
[Nov 12, 2025] – Sprint 2 Standup #2

1) What did you work on since the last standup?
I'm working on the logic for split expenses of the ticket "E3TXS-29: Add and Split Group Expenses". I have added new files to the backend including group expenses and group splits for controller, model, and repo. I have also worked on incorporating user authentication more into the other functions of the website and what that would look like.

2) What do you commit to next?
I plan on committing the completed the ticket and merging it to the main branch. Additionally, I'll work on any required files with the team like schedule.pd, etc

3) When do you think you'll be done?
I am estimating that the tasks will be completed this weekend.

4) Do you have any blockers?
No major blockers as of now. Although to make sure the split task is functioning correctly, I need to create different users and add them in a group.

Eesha — 12/11/2025, 21:49
[Nov 12, 2025] – Sprint 2 Standup #2
1) What did you work on since the last standup?
I finished up all the remaining work for the view/manage group feature. I set up the group tables in Supabase, updated the backend to handle the new relationships, and tested the group creation. Everything is now working smoothly in the UI, and I've pushed and committed the changes.

2) What do you commit to next?
I am going to start working on E3TXS-44, the UI side of the recurring monthly expenses feature. I am going to add the recurring expenses checkbox in the Add Expense pop-up.

3) When do you think you'll be done?
I should have the checkbox feature done by Saturday.

4) Do you have any blockers?
No major blockers right now.

Ashal — 12/11/2025, 22:11
[Nov 12, 2025] – Sprint 2 Standup #2

1) What did you work on since the last standup?

I finished up with the e3txs-37: create dashboard (current-month-default) by adding total expense and category by choosing a month on the dashboard. I also added monthly expenses in the dashboard as well. Everything worked when I merged with the develop branch.

2) What do you commit to next?

I have already started to work on e3txs-23: group expenses where a user will be able to see expenses of the groups they have made or added in.

3) When do you think you'll be done?

I should be done by Saturday.

4) Do you have any blockers?

No, not any blackers.

Melanie — 12/11/2025, 22:39
[Nov 12, 2025] – Sprint 2 Standup #2

1) What did you work on since the last standup?
Since the last standup I continued working on and finished the feature E3TXS-43 Backend for Recurring. The expense class as well as controller was updated to implement the backend logic for recurring expenses. Now the add expense method will add the recurring expense to each future month and works as expected.

2) What do you commit to next?
Next I will start working on the feature E3TXS-26 Piechart with Interactive Legend. The pie chart will be on the dashboard page and show the percentage of total spending by category for the current month. As well, I will include an interactive legend to go along with the chart.

3) When do you think you'll be done?

I will finish this feature by Saturday November 15.

4) Do you have any blockers?
No blockers as of now.

November 15, 3rd Standup

Eesha — 15/11/2025, 20:09
[Nov 15, 2025] – Sprint 2 Standup #3

1) What did you work on since the last standup?
Since the last standup, I added the checkbox for recurring expenses to the add expense modal for ticket number E3TXS-44. Now, a user can select whether or not an expense is recurring when creating a new expense, and it will update the backend accordingly.

2) What do you commit to next?
Next, I plan to work on any bugs or issues that may arise during our testing and final processes before filming our demo video.

3) When do you think you'll be done?
Since the main tickets assigned to me have been completed, any additional fixes, if any, will be finished by Sunday night.

4) Do you have any blockers?
No major blockers right now.

Melanie — 15/11/2025, 20:34
[Nov 15, 2025] – Sprint 2 Standup #3

1) What did you work on since the last standup?
Since the last standup, I finished the E3TXS-26 Piechart with Interactive Legend feature. Now, when on the dashboard page, the user will be able to see a pie chart of their spending by category for that month as well as interact with the legend to view their expenses for a specific category.

2) What do you commit to next?
Next I plan to resolve any bugs/issues that might come up during our testing to ensure that the application is working properly. I will also work on sprint 2 documentation.

3) When do you think you'll be done?
I have completed all of my assigned tasks for this sprint and if any fixes are needed, they will be completed by Sunday November 16.

4) Do you have any blockers?
No blockers.

Priya — 15/11/2025, 22:22
[Nov 15, 2025] – Sprint 2 Standup #3

1) What did you work on since the last standup?
Since the last standup I have been creating CRC Cards for any new classes that the team has been working on this week and updating the architecture diagram in the System Design document.

2) What do you commit to next?
Next, I commit to finishing off this system design document, and also planning out the demo video to ensure all of our features are showcased. I will also keep an eye on all of my features to ensure that if there are any issues or bugs that come up they can be fixed quickly.

3) When do you think you'll be done?
Since all of my tickets have been completed, my main goal is to finish the system design document and filming the video Sunday night so that we can be ready to start sprint 3 on tuesday.

4) Do you have any blockers?
None as of right now.

Abrar — 15/11/2025, 23:11
[Nov 15, 2025] – Sprint 2 Standup #3

1) What did you work on since the last standup?
Since the last standup, I added the split options for users in groups and the schedule file.

2) What do you commit to next?
I plan to commit completed branch and the file to doc.

3) When do you think you'll be done?
Completed by Sunday

4) Do you have any blockers?
No major blockers right now.

Ashal — 15/11/2025, 23:15
[Nov 15, 2025] – Sprint 2 Standup #3

1) What did you work on since the last standup?
Since the last standup, I finished up the backend portion for the view group expenses

2) What do you commit to next?

I plan to commit to finish the frontend of it.

3) When do you think you'll be done?

I should be done early tomorrow.

4) Do you have any blockers?

No
